WATER TRUCKS

– Aluminium Tanks –

✓ WALL BAFFLED

Crossway tank baffle walls to minimise front and rear water surge during vehicle motion.

✓ TANK CAPACITY

Standard tank module sizes: from 8,000Lt to 16,000Lt.

✓ WARRANTY

12-month warranty on aluminium tanks.

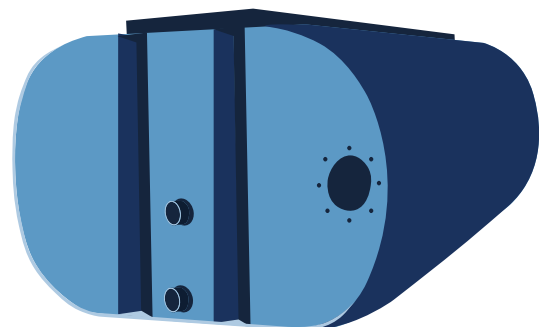

Our quality aluminium water tanks are constructed from marine grade aluminium, providing high resistance to corrosion and exceptional payload capacity.

- Elliptical tank outer shell for additional strength and weight optimisation.
- Advanced stability control; including low profile tank design with internal baffles and round corners for surge protection.
- Mounted on vehicle via heavy-duty 3 point mount with trunnion to allow for chassis flex.
- Two-pack epoxy paint system with topcoat white paint finish on the outside.
- Built-in overflow system to adjust aluminium truck capacity to suit different cab chassis or reduce the capacity for on-road use and increase capacity for off-road use.

Australian made for Australian conditions.
