15-year warranty on all poly tanks.

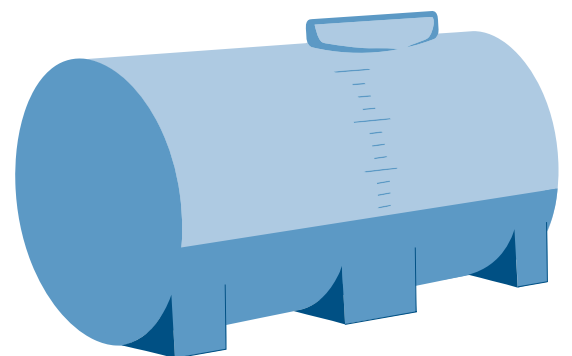

Polyethylene is a very economical water cartage option. Our range of high-impact poly water tanks are made from lightweight recyclable material.

- A lightweight option, providing greater payload with less wear on the vehicle.
- Will never rust, even when continuously used for polluted or acidic water.
- Poly tanks do not crack, buckle, or tear, even in the harshest environments.
- No need for spring and pivot mounting as poly tanks flex with the vehicle.
- Fully ball baffled to provide stability and counter water surge during transportation.
- Approved potable grade poly water tanks.
- 19 different tank colours to choose from without ever painting the exterior.

Australian made for Australian conditions.
